Water System improvements:

As easily seen, the concrete casting portion of the new water tower is complete, The 110 foot structure is now being topped with a 300,000 gallon tank. The tank will be painted light blue in color and have the town's logo on the side.

Construction will begin shortly on new water lines. These are main lines that connect the new tower to the Town's existing water system. They will be increased in size to allow for improved delivery capacity and better water circulation which helps improve water quality. One area receiving increase supply is the Ella Young area. This provides a base for future improvements for the residents.

As always, check the Town's website for the latest information <http://www.lakesidetexas.us/>
