SMART IRRIGATION TIPS

Watering our lawns accounts for about half of all the water we use at home. Experts tell us most lawns get twice as much water as they really need. * Water twice a week or less. If you water more than 2 days a week you're watering too much. * Don't water between 10 AM and 6 PM. Up to 30% of the water we spray on lawns during the heat of the day is lost to evaporation. * Cycle and soak to avoid runoff. Irrigate in shorter bursts to give water time to soak in, and allow 30 minutes or more between cycles. * Tune up your irrigation systems. Fix leaks or damaged sprinkler heads and make sure they are pointed at the landscape.

Friendly Reminder:

If you have any changes to your information such as new phone number, new alarm company, etc. please be sure to let us know in order to keep our records current.
