When Do I Need A Permit?

Most home improvements projects beyond cosmetic work require a building permit. The permit and inspection process helps protect you family from safety risks like structural failures, fire hazards or electrical shock. It may also help eliminate costly repairs for shoddy work. The following are some common projects that require permits:

- Installing or replacing water heaters, HVAC systems, water lines or sewer lines
- Any electrical or gas line work
- Installing solar panels
- Building an addition
- Pouring of concrete, widening/replacing driveway
- Construction of a storage building, carport or patio cover
- Installing a tornado shelter
- Installing a lawn irrigation system
- Swimming Pools
- RV buildings

Safety is the primary reason building permits are required. When a permit is issued, the work will be inspected to make sure it is done correctly and in compliance with current building and safety codes. It is the homeowner's responsibility to make sure that their contractor obtains a building permit. You will be charged double the permit fee for any work done before a permit is obtained. Permits should be displayed on the site until the work is completed and passes inspection. For more information, please contact Town Hall at 817-237-1234.
